Are a Lot of Transients. The local stone cutters' union make the following reply to the statement put out by the local branch of the International Stone Cutters' union, which shows the situation in a different light

from that represented by the latter; The G. U. stone cutters seem to be greatly annoyed, and jarred at the idea of the planer taking money from the local channels of trade. The local union stone cutters of Salt Lake City, wish heir fellow citizens to understand that hey are all men who have made Utah their home, and none other belongs to their union, and in the estimation of the local stone cutters, there will be more money circulated in the local channels of trade, than would be if the planer was thrown out, and the 3. U. men did the work. For this realaner, are most part transient stone atters, who travel all over the country, stopping only where they think they can make the most of their time, and as a rule, make it as disagreeable for the local men who are

not of their belief. Now, were the planer to be ousted, and the transient stone cutters to do the work, the money that they would take out of Salt Lake City, would be he planer. It will be easily seen that cutter is on better for Salt Lake City And furthermore the local union men re progressive enough to welcome dern machinery.
